TOTAL 614

ADMISSION TO THE COLLEGE.

FOR admission to the Freshman Class the candidates are examined in the following books : — viz.

BY THE LATIN DEPARTMENT,

in the whole of Virgil and of Cæsar,* in Cicero's Select Orations, Andrews and Stoddard's Latin Grammar,* including Prosody, and in writing Latin.

BY THE GREEK DEPARTMENT,

in Felton's Greek Reader, Sophocles's Greek Grammar, including Prosody, and in writing Greek (with the accents).

BY THE MATHEMATICAL DEPARTMENT,

in Davies's and Lacroix's Arithmetic; Euler's Algebra, or Davies's First Lessons in Algebra to "the Extraction of the Square Root"; and "An Introduction to Geometry and the Science of Form, prepared from the most approved Prussian Text-Books," to "VII. Of Proportions." Also in Worcester's Ancient and Modern Geography.

Note. The examination upon Geometry will be especially directed to ascertain the distinctness of the pupil's ideas upon the nature of forms.

It is very desirable and important, that the candidates should be well and correctly prepared, particularly in grammatical and elementary knowledge. If they have more time than is requisite for this purpose, instructors are desired and advised, for obvious reasons, not to anticipate the College studies, but rather to extend their studies to other authors.

* Teachers are requested particularly to notice that Cæsar's Commentaries and Andrews and Stoddard's Latin Grammar are *required* books.

The examination for the Freshman Class occupies two days, and takes place on the Monday and Tuesday, (the 25th and 26th of August, 1845) of Commencement week, beginning precisely at 6 o'clock, *A. M.*, on Monday morning. Attendance on both days is required.

No person will be examined for admission to the College at any other time than the commencement of a term, except in extraordinary cases.

Parents and instructors are requested not to offer candidates for examination, when it is not their intention, that, if admitted, they shall immediately join the class; and the Faculty will, for the future, decline entering on the examination of candidates under such circumstances.

Persons may be admitted to advanced standing, at any part of the College course previous to the Second Term of the Senior year. In order to such admission to advanced standing, the candidate must appear, on examination, to be well versed in the following studies, viz.

1. In the studies required for admission to the Freshman Class.
2. In all the *required studies* pursued by the class, for which he is offered.
3. And in the *elective studies* of two out of the three departments of Greek, Latin, and Mathematics, pursued by that class for which he is offered. He must also pay into the Treasury, at the rate of \$45 per annum, according to the standing to which he is admitted. Any scholar, however, who has a regular dismissal from another college, may be admitted to the same standing, if on examination he is found qualified, without any pecuniary consideration.

The University is open to persons who are not candidates for a degree, and who desire to study in particular departments only: Provided, that such persons have a good moral character; that their previous acquisitions be such as are now demanded of Students before admission, so far as the studies proposed to be pursued shall require; and that they be subject to all the laws of the University, in regard to diligence, good conduct, and college discipline.

Every person, before examination, must produce proper testimonials of a good moral character, and, after being accepted on examination, must give a bond with sureties, of which one at least must belong to this Commonwealth, to the satisfaction of the Steward of the College, in the sum of four hundred dollars, to pay all charges ac-

cruing under the laws and customs of the University. A certificate that such bond has been given, must be exhibited to the President, before any person can be admitted to the privileges of the Institution.

The academical year is divided into two TERMS and two VACATIONS: —

The first Term commences on the Friday next succeeding Commencement (30th of August, 1844), and continues twenty weeks.

The first Vacation commences at the end of the first Term (January 17th, 1845), and continues six weeks.

The second Term commences at the end of the first Vacation (February 28th, 1845), and continues twenty weeks.

The second Vacation commences at the end of the second Term (July 18th), and continues until the Friday after Commencement.

The Public Exhibitions are on the third Tuesday (15th) of October, the first Tuesday (6th) of May, and the last Wednesday of the second Term (16th of July).

The Dudleian Lecture is on the second Wednesday (14th) of May.

COMMENCEMENT is on the fourth Wednesday (27th) of August, 1845.

Each class present a Greek and Latin exercise once a fortnight.

At convenient times, the several studies are reviewed, and the students examined.

DIVINITY SCHOOL.

Candidates for admission are expected to present themselves on the Friday after Commencement. If unknown to the Faculty, they are to produce testimonials to their moral and serious character. Candidates, not Bachelors of Arts, will be examined in Latin and Greek Grammar, Virgil, Cicero's Select Orations, Sallust, Felton's Greek Reader, the first four books of Xenophon's *Anabasis*, the first book of Herodotus, or the two first books of Xenophon's *Memorabilia*, Locke's Essay, Stewart's Elements of the Philosophy of Mind, Paley's Moral Philosophy, and Jouffroy's Introduction to Ethics, Butler's Analogy, and some approved compendium of Logic, Rhetoric, and Geography. Whateley's Rhetoric and Logic are preferred.

Candidates for admission to an advanced standing must have been engaged in the study of Theology as long as the class into which they propose to be received; and pass an examination in the studies which that class has pursued.

Students are required to reside in or near Divinity College. They give bonds in the sum of \$100 for the payment of term-bills, which, including charges for instruction, rent and care of room and furniture, and use of class-books, amount to \$66 annually. Board may be had in the College Commons for \$1.75 or \$2.25 a week. Each student must possess a copy of the Old and New Testament Scriptures, in the original languages, the latter in Griesbach's edition. A copy of all other class-books is furnished on loan. Indigent students are aided from foundations and other sources. Three years, including the vacations, which amount to twelve weeks in each year, complete the term of residence.

The course of instruction comprises Lectures, Recitations, and other exercises, on all the subjects usually included in a system of Theological Education; — Hebrew, the Criticism and Interpretation

of the Scriptures, Natural Religion, Evidences of Revealed Religion, Systematic Theology, Christian Ethics, Church History, Church Polity, the Composition and Delivery of Sermons, and the Duties of the Pastoral Office. The members of the two upper classes have a weekly exercise in the practice of Extemporaneous Speaking, and the members of the Senior Class preach in the village church during the summer term.

Students are entitled to receive instruction from the Instructor in the German Language, and to be present at all public lectures of the University.

It is considered of great importance that those who enter the School should be present at the beginning of the first term.

LAW SCHOOL.

THE design of this Institution is to afford a complete course of legal education for gentlemen intended for the Bar in any of the United States, and also a systematic course of studies in commercial jurisprudence, for those who intend to devote themselves exclusively to mercantile business and pursuits. The course of instruction for gentlemen intended for the Bar embraces the various branches of Public and Constitutional Law, Admiralty, Maritime, Equity, and Common Law, which are common to all the United States, with occasional illustrations of Foreign Jurisprudence. The course of instruction for gentlemen intended for the mercantile profession is more limited; and embraces the principal branches only of commercial jurisprudence, to wit, The Law of Agency, of Partnership, of Bailments, of Bills of Exchange and Promissory Notes, of Insurance, of Shipping, Navigation, and other Maritime concerns, and of Sales, and, if the Students desire it, also of Constitutional Law. No public instruction is given in the local or peculiar municipal jurisprudence of any particular State; but the students are assisted by the Professors, as occasion may require, in their private study of the law and practice peculiar to their own States. The active labors of instruction are shared equally by MR. JUSTICE STORY, who is Dane Professor of Law in the University, and by MR. GREENLEAF, the Royall Professor of Law, who has the immediate direction and superintendence of the Law School.

The Law Library consists of more than 8,600 volumes, and includes all the American Reports, and the Statutes of the United States, as well as those of all the States, a regular series of all the English Reports, including the Year-books, and also the English Statutes, as well as the principal treatises in American and English Law, besides a large collection of Scotch, French, Dutch, Spanish, Italian, and other Foreign Law, and a very ample collection of the best editions of the Roman or Civil Law, together with the works of the most celebrated commentators upon that Law.

No examination and no particular course of previous study are necessary for admission ; but the student must produce testimonials of good moral character. He also gives a bond in the sum of \$ 200 to the Steward, with a surety resident in Massachusetts, for the payment of College dues ; or deposits, at his election, \$ 150 with the Steward, *at the commencement of each term*, to be retained by him till the end of the term, and then to be accounted for. No student is matriculated until such testimonials are produced, and security given.

Students may enter the School in any stage of their professional studies, or mercantile pursuits. But they are advised to enter at the beginning of those studies, rather than at a later period, as the most useful to themselves. They may also elect what particular studies they will pursue.

The fees are at the rate of \$ 50 a term, and \$ 25 for half or any lesser fraction of a term ; * for which sum, without any additional charge, students have the use of the lecture rooms, the Law and College Libraries, and the text-books ; and they are admitted free to all the public lectures in the University, comprising Lectures on Anatomy, by Dr. WARREN ; on Chemistry, Mineralogy, and Geology, by Dr. WEBSTER ; on the Application of the Sciences to the Useful Arts, by Professor TREADWELL ; on the Means of preserving Health, by Professor JOHN WARE ; on History, by Professor SPARKS ; on Rhetoric and Criticism, by Professor CHANNING ; on the French, Spanish, German, and Italian Languages and Literature, by Professor LONGFELLOW ; on Botany, by Professor GRAY ; and on Physics and Astronomy, by Professor LOVERING. They may also study any foreign language taught in the University, for \$ 10 per annum. Fuel, prepared for use, is furnished, at cost, by the Steward, if the students desire it.

* The other expenses for a term are as follows :—

| | | |
|-----------------------------------------------------------------|-----------------|----------|
| Board, twenty weeks, at \$ 1.75 to \$ 3.50 per week, | from \$ 35 | to \$ 70 |
| Room-rent, including care of room, but not making fires, | 26 | to 52 |
| Furniture, (if the student does not furnish his own,) . | 10 | to 20 |
| Washing, | 7.50 | to 15 |
| Fuel, for the first or winter term, from August to January, | 12 | to 21 |
| “ for the second or summer term, from February to July, | | |
| from \$ 6 to \$ 10. | | |
| Servant, (if one is employed,) to make fires, clean boots, &c., | 5 | to 10 |
| | \$ 95.50 to 138 | |

The course of studies is so arranged as to be completed in two years and a half; and, after the first term of professional study, students are generally at liberty to join any one or more of the classes, in as many studies as they may choose, according to their view of their own wants and attainments.

The Academical year, which commences on the Friday after the fourth Wednesday in August, is divided into two terms of twenty weeks each, with a vacation of six weeks at the end of each term.

For the two Academical years, (the first commencing in the even-numbered years, viz. 1844, 1846, 1848, &c.) the following books are read with Professor STORY. *FIRST YEAR. First Term.* Marshall on Insurance; Long on Sales; Story on Equity Jurisprudence and Pleadings. *Second Term.* Story on Agency; Story on Partnership; Story on Equity Jurisprudence and Pleadings. *SECOND YEAR, (commencing in the odd-numbered years, 1845, 1847, &c.) First Term.* Story on Bills of Exchange, and Promissory Notes; Story on the Conflict of Laws; Story on Equity Jurisprudence and Pleadings, as in the preceding year. *Second Term.* Abbott on Shipping; Story on the Constitution; Story on Equity Jurisprudence and Pleadings, as in the preceding year. The following books are read with Professor GREENLEAF. *FIRST YEAR. First Term.* Blackstone's Commentaries; Greenleaf on Evidence; Stephen on Pleading; Chitty on Pleading. *Second Term.* Kent's Commentaries; Cruise's Digest of the Law of Real Property. *SECOND YEAR. First Term.* Blackstone's Commentaries; Story on Bailments; Story on Contracts; Angell and Ames on Corporations. *Second Term.* Kent's Commentaries; Cruise's Digest of the Law of Real Property. For gentlemen who remain in the Institution beyond two years and a half, other studies are from time to time prescribed.

Instruction is given by recitations, by examinations, and by oral lectures and expositions, of which each Professor gives at least six, every week, to the several classes. A Moot Court is holden in each week, at which a cause, previously given out, is argued by four students, and an opinion is delivered by the presiding Professor.

All students who have pursued their studies in the Law School for three terms, or eighteen months, and have passed a satisfactory examination; or who, having been admitted to the Bar after a year's previous study, have subsequently pursued their studies in the Law School for one year; are entitled, upon the certificate and recommendation of the Law Faculty, to the degree of Bachelor of Laws.

COURSE OF STUDY.

THE books marked thus (*) compose the course which is completed in two years and a half. The studies of gentlemen who remain longer in the School are pursued in other books in the *regular course*, to which others are added from time to time, as far as the leisure and progress of the Students may permit. The *parallel course* is prescribed chiefly for private reading.

MEDICAL SCHOOL.

The Medical Lectures form a department of instruction in Harvard University. They begin annually, at the Medical College in Mason Street, BOSTON, on the first Wednesday in November, and continue four months.

The Introductory Lecture is given at 12 o'clock of the above day, in the Anatomical Theatre, by the Professors in rotation.

The following are the courses of Lectures delivered in this College, with the fees annexed.

| | | FEES.* |
|-----------------------------------------------------------------|-------------------------|----------|
| <i>Anatomy and Operative Surgery,</i> | Prof. WARREN. | \$ 15.00 |
| <i>Midwifery and Med. Jurisprudence,</i> | Prof. CHANNING. | 10.00 |
| <i>Materia Medica,</i> | Prof. BIGELOW. | 10.00 |
| <i>Principles of Surg. and Clin. Surg.</i> | Prof. HAYWARD. | 10.00 |
| <i>Chemistry,</i> | Prof. WEBSTER. | 15.00 |
| <i>Theory and Practice of Physic and Clinical Medicine,</i> | Prof. WARE and BIGELOW. | 15.00 |

The fee for matriculation is \$3. This fee is appropriated to the increase of the Library, and is to be paid to the Dean by all persons who propose to attend any of the courses.

The Hospital and Library are gratuitous. Tickets for Dissecting-Room, \$5. No exertions are spared to obtain a supply of subjects according to the existing laws, and to furnish to the class the means of pursuing the important branch of practical anatomy. Board is as low as in any of our cities.

The Clinical Lectures in Medicine and Surgery are given to the class on cases in the Massachusetts General Hospital, three times a week. Surgical operations at the Hospital are frequent. An abundant opportunity is thus furnished for students for most important practical observation and study.

* Fees for the Tickets are required to be paid for when the Tickets are taken out, and no person can be admitted to a lecture who does not exhibit his ticket for the same when called for.

The Lectures on ANATOMY and OPERATIVE SURGERY are delivered daily. They are so arranged that the anatomy of one part of the body is made to illustrate that of another. The operations of surgery, instead of following each other in a routine which is sometimes tedious to the student, are intermixed with the anatomical demonstrations of parts concerned in operations. All the new operations are particularly shown.

The demonstrations of anatomy, and those of the operations, are aided by a large cabinet. The professor in this department has added to his extensive collection a number of valuable preparations in wax, to show various tumors and diseases of the skin; some colored casts in plaster of Paris; many beautiful magnified drawings of subjects in anatomy and surgery; and also the newly invented surgical instruments.

The accommodations for private dissection are ample, and as reasonable in regard to expense as in any medical school in the country. No means are spared in obtaining a sufficient supply of subjects for dissection, and the students are aided in their dissections and preparations by an able and attentive demonstrator.

MIDWIFERY and MEDICAL JURISPRUDENCE form one department. Lectures are regularly given on the Principles and Practice of Midwifery. Separate Lectures are given in Operative Midwifery. Abundant opportunity is furnished to each member of the class to learn the use of instruments. The Lectures are illustrated by models made in Florence, and by plates. The Lectures on Medical Jurisprudence are very much confined to the statement of principles, which are illustrated by cases.

The Lectures on MATERIA MEDICA consist of the history of the various articles used in medicine, their physical and medicinal properties, their application to the treatment of disease, and the forms, modes, and quantities in which they are administered. Specimens of each medicine, and colored engravings of medicinal plants, are exhibited at the Lectures, while an opportunity to observe the effect of those most in use, is afforded in the Clinical Lectures given by the professor at the Hospital.

The Lectures on the PRINCIPLES OF SURGERY and CLINICAL SURGERY continue four months, during which the students visit the surgical patients at the Hospital and attend all the operations.

In the Clinical Lectures, the Professor speaks of every case that is admitted into the surgical department of the Hospital; describes the

disease ; gives the diagnosis and prognosis at some length, with the mode of treatment. In the Clinical Lectures are described the surgical operations which are performed, with such remarks as to the mode of performing them, and the particular manner in which each operation is done, as are thought likely to be useful and instructive to the students.

A collection, made in Europe, of plaster models, colored to represent various surgical diseases, has been recently introduced into this department.

The CHEMICAL LECTURES are continued during four months, four Lectures being given each week. The chemical apparatus, to which additions are constantly made, is very extensive, and enables the Professor to illustrate the various subjects with all the requisite experiments.

The course of the THEORY AND PRACTICE OF PHYSIC embraces the Lectures given at the Medical College, on the general principles of Pathology and Therapeutics, and on the history and treatment of particular diseases, and the Clinical Lectures given at the Massachusetts General Hospital. A collection of preparations in plaster, to the number of about fifty, admirably colored, has been recently imported from Paris, for the use of this department. These preparations serve to exhibit, not only the morbid anatomy of the particular diseases of which they are examples, but also constitute a series of illustrations of the various elementary forms of disease. Morbid *post-mortem* appearances, in recent specimens, form very important means of pathological instruction in this department.

The Clinical Lectures at the Hospital are given twice a week, and occupy two hours each. Students have an opportunity of visiting all the cases, and of observing and learning the symptoms and treatment of each case, and particularly of the exploration of the body, for the PHYSICAL SIGNS of disease, by *palpation*, *auscultation*, and *percussion*.

Taking into view the amount of instruction given in this School, the splendid and extensive apparatus with which it is furnished, its connection with the numerous cases and operations of one of the best conducted hospitals in the United States, together with the general thorough acquisitions and high respectability of its graduates, it may be doubted whether any seminary in the country offers the means of a more complete professional education, than may be obtained in the Medical School of Boston.

STATUTES RELATING TO THE DEGREE OF DOCTOR OF MEDICINE.

I. — The Faculty of Medicine of this University shall consist of the President, and of the Professors and Lecturers authorized to give instruction to the medical students. This Faculty shall always have a Dean elected by themselves, for such periods as they may think proper, and may also adopt rules for their own government, provided that the same do not, in any respect, contravene the laws of the University.

II. — Students of medicine, designing to attend the Medical Lectures, or any of them, shall be matriculated in this University, by entering their names with the Dean of the Faculty of Medicine, to be enrolled by him; and by signing an obligation to submit to the laws of the University, and to the direction of the Faculty of Medicine, and by paying three dollars.

III. — There shall be holden by the Faculty four meetings annually for the purpose of examining candidates for the degree of Doctor of Medicine. Two of these meetings shall be for private and two for public examinations. They shall be holden in the Massachusetts Medical College, unless otherwise specially ordered. They may be continued by adjournment, by vote of the members present; and if only one member attend at the time and place designated, he may adjourn the meeting from day to day till three members of the Faculty may attend the meeting. Three members of the Faculty must be present on every examination.

IV. — The first meeting for private examination in every year shall be holden on the day next succeeding that on which the winter courses of Medical Lectures shall terminate, at ten o'clock, A. M. The second meeting for private examinations, shall be holden on the Monday next but one preceding the day of the annual Commencement in the University, at ten o'clock, A. M. In extraordinary cases, the Faculty may hold meetings for private examinations at other periods.

V. — The meetings for public examinations shall be holden within one week after the termination of the stated annual meetings for private examinations respectively, on such days as the Faculty may appoint, if not otherwise ordered by the President. These meetings shall be open to the Governors and Inspectors of the University, to the Fellows of the Massachusetts Medical Society, and to such other respectable persons as may wish to attend them.

VI. — Every candidate for the degree of Doctor of Medicine must comply with the following conditions before being admitted to a private examination, viz.

1. He shall satisfy the Faculty that he has arrived at the age of twenty-one.

2. He shall have attended two courses of the Lectures delivered at the Massachusetts Medical College by each of the Professors. Except that if he have attended a course of similar Lectures in any other College or University, the same may take the place of one of the above courses.*

3. He shall have employed three years in his professional studies, under the direction of a regular practitioner of medicine.

4. If he has not received a University education, he shall satisfy the Faculty of Medicine in respect to his knowledge of the Latin language and experimental philosophy.†

5. He shall, four weeks previous to the day on which he presents himself for examination, have given notice of his intention to the Dean of the Faculty, and at the same time shall have delivered or transmitted to the Dean a dissertation, written by himself, on some subject connected with medicine.

VII. — Every dissertation shall be submitted by the Dean to the examination of the Faculty in the mode which they shall point out.

VIII. — At the meetings for private examinations, the Faculty shall examine all those candidates who shall present themselves, after having complied with the conditions enumerated in the sixth of these statutes, upon the following branches of medical science, viz., Anatomy, Physiology, Chemistry, Materia Medica, Pharmacy,

* A third course may be attended without fee, provided that no two courses of Lectures shall be admitted to qualify students for gratuitous admission to Lectures in this school, which have not been attended in separate years, or at least six months from each other.

At a meeting of the Medical Faculty, May 29, 1841, it was

Voted, That hereafter two full courses of Lectures in this School be required of candidates for the degree of Doctor in Medicine. But for one of these courses a substitute may be received in a course of Lectures at any other medical institution in which the number of teachers is not less than six, and in which the time occupied by lectures is not less than four months.

† Certificates of competent persons are deemed satisfactory, without a personal examination.

Midwifery, Surgery, and the Theory and Practice of Medicine. At these meetings every candidate shall be examined separately, and the decision of the Faculty in respect to each shall be made and declared to him immediately after the examination has closed. The decision in respect to each candidate shall be determined by the votes of the major part of the members of the Faculty present at the examination of the same; and this decision, if favorable to the candidate, shall be recorded by the Dean. In the decisions to be made at these meetings, regard shall be had to the dissertations, as well as to the examinations.

IX. — Those candidates, who have been approved according to the eighth of these statutes, may present themselves at the public examination next ensuing after such approbation. Each candidate so presenting himself shall then read and defend, or be examined upon, the dissertation which he shall have previously submitted to the Faculty. At the close of each public examination, the Faculty shall decide in respect to each candidate, whether he shall be recommended as worthy of the degree for which he has applied. The decision of the Faculty, in respect to all those candidates whom they do so recommend, shall be recorded by the Dean, and shall by him be certified to the President, to be laid before the *Senatus Academicus*.

X. — Those candidates, who have received from the *Senatus Academicus* the final approbation, will be directed by the President to appear at Cambridge at such time as he may appoint, and he will then admit each of them, with the accustomed solemnities, to the degree of Doctor of Medicine.

The Lectures for Medical Students, on the various branches mentioned in the Statutes, are delivered at the Massachusetts Medical College in Boston. They commence annually on the first Wednesday in November, and continue four months.

Students attending the Lectures of the Professor of Anatomy and Surgery are admitted to see the Surgical Practice in the Massachusetts General Hospital; and those, attending the Lectures of the Professor of the Theory and Practice of Medicine, are admitted to see the Medical Practice in the same.

The Hollis Professor of Natural Philosophy will admit Medical Students to attend the Lectures on Physics and Astronomy. The Lectures are delivered in the Philosophy Chamber in Univer-

sity Hall, at such times as the Professor may give notice from term to term. A Medical Student, applying for admission to these Lectures, must produce, to the Professor above mentioned, a certificate of his matriculation from the Dean of the Faculty of Medicine, and another certificate from the Steward of the University, that he has paid him seven dollars for the Treasurer. Other persons may be admitted to the same Lectures, with the approbation of the President, and producing a certificate from the Steward that they have paid ten dollars.

At the private examinations, the candidates will present their certificates from the Physicians under whose care they have studied; also their tickets of admission to the several courses of Medical Lectures.

The fee for the degree of Doctor of Medicine is twenty dollars and is to be paid to the Dean.

LIBRARY.

The University Library is divided into four departments, viz., Theological, Medical, Law, and Public; which last, besides books in all other departments of learning, embraces also an extensive collection of works on Theology, Medicine, and Law.

The Theological Library is in Divinity Hall. Persons entitled to its privileges must be connected with the Divinity School. Number of books, about 3,000. They consist of valuable select works, principally in modern Theology, with some of the early Fathers in the original. Means have been recently devised to add to the Library valuable modern works in Theology and Morals, as they are published.

The Medical Library is in the Medical College in Boston. It is placed there for the convenience of students attending the medical lectures. The number of books is about ten or twelve hundred. It contains all the elementary works which are the most important and the most used by students. Besides these, it has the writings of the early Greek and Latin medical fathers, and the works of the later medical classics; and, with the latter, it contains numerous valuable modern works.

The Law Library is in Dane Law College. It is designed for the officers and students of the Law Institution. Number of books, about 8,600. It contains most of the valuable works in English and American Law, and in the Civil Law, together with a variety of others by writers of France, Germany, and Spain.

The Public or *College* Library is in Gore Hall. This is much larger than the others, and is rapidly increasing. It is for the common use of the whole University, in this respect differing from the other branches of the University Library. The total number of books is about 46,000. Of these, 2,500 are allowed for duplicates, and 1,000 for the Boylston Medical Library, which is *immediately* connected with it.

The total number of books in the University Library is, then, as follows:—

| | | |
|-----------------------------------|-------------|--------------|
| Theological Library | | about 3,000 |
| Medical | do. | " 1,000 |
| Law | do. | " 8,600 |
| Public | do. | " 46,000 |
| Society Libraries of the Students | | " 10,000 |
| | | <hr/> |
| Total | | about 68,600 |

EXPENSES.

The necessary expenses for a year, included in the College bills, are as follows : —

| | |
|-----------------------------------------------------|----------------|
| Instruction, Library, Lecture-rooms | \$ 75·00 |
| Rent and Care of Room | 15·00 |
| Board for 40 weeks at \$ 2·25 per week | 90·00 |
| Or Board for 40 weeks at \$ 1·75 per week | \$ 70·00 |
| Text-books | 12·00 |
| Special Repairs, &c. | from 1 to 2·00 |
| | <hr/> \$194·00 |

Other expenses must vary with the economy of each Student. Wood and Coal ready for use are delivered at the Students' rooms, by the University, at cost, varying with the market price, but usually at \$ 6·50 per cord for wood, and \$ 7 per ton for coal. The price of washing is from \$ 3 to \$ 5 per quarter. The rent of rooms in private houses, from \$ 30 to \$ 60 per annum. Board in the town, from \$ 2·25 to \$ 3·50. The Students find their own beds and furniture.

The bills containing college charges are to be made out at the end of each term; and must be settled within a week from the commencement of the succeeding term.

LAWS RELATIVE TO THE PATRON.

[EXTRACTED FROM THE GENERAL LAWS OF THE UNIVERSITY.]

Some gentleman of Cambridge, not of the Faculty, shall be appointed by the Corporation to be Patron of all Students, not of this Commonwealth, who belong to places more than one hundred miles distant from Cambridge, and shall have charge of all the funds of such Students.

The Patron shall have particular instruction from the authorities of the University concerning the kind of expenses allowed to be incurred by the Students whose funds are in his hands; and he shall make no disbursements and pay no bills inconsistent with such instructions, and whatever bills he may pay shall contain a distinct specification and charge of every article.

The Patron shall give a detailed account of the expenses incurred by each Student under his care to the Faculty, and to the Corporation, when required.

The parent or guardian of each Student shall be informed what are the necessary annual expenses included in the term-bills; and he shall also be informed by the Patron what funds for the support and use of his son or ward must be remitted to him; and the Patron is to have the whole control of the same, under the direction of the Faculty.

No Student, subject to this law, shall be permitted to continue at the University, unless he comply with it; and every such Student is to be charged in his term-bills at the rate of six dollars a year, towards a compensation to the Patron.

No such Student is allowed to contract any debt without an order from the Patron.
